Education

COER University

B.Tech in Computer Science

- GPA: 7.88/10.0

August 2022 – 2026

Roorkee, Uttarakhand

Experience

Full-Stack Developer

Ispesia Technologies Pvt Ltd.

Dehradun, Uttarakhand

November 2025 – Present

- Architected a scalable monorepo for an internal CRM platform using TurboRepo, separating Next.js frontend and Node.js/Express backend services for improved maintainability and faster deployments
- Dockerized development and production environments using multi-stage Docker and Podman builds, reducing developer onboarding from 2 days to 2 hours and eliminating environment inconsistencies across a four-member team
- Implemented Redis-based caching layer for high-read CRM APIs handling 10K+ requests daily, reducing average response time from 800ms to 120ms and cutting database load by 65%
- Designed and developed a granular Role-Based Access Control (RBAC) system using JWT and custom middleware to securely manage Admin, Manager, and User access
- Established a CI/CD pipeline using GitHub Actions with automated testing (Jest/Vitest), achieving 80% code coverage and reducing deployment time from 45 minutes to 8 minutes

SDE Intern

Bluestock Fintech Pvt Ltd.

Pune, Maharashtra

March 2025 – April 2025

- Developed production-grade IPO application frontend using React.js, implementing complex data visualization tools with Chart.js and D3.js to track real-time market trends for 10K+ daily active users
- Optimized frontend rendering through improved state management using React.memo and useMemo, reducing unnecessary re-renders by 35% and improving initial load time by 20% (from 2.8s to 2.2s)

Full-Stack Development Intern

Microdot Tech Aspire Solutions (P) Ltd.

Noida, Uttar Pradesh

June 2023 – August 2023

- Engineered scalable web applications using the MERN stack, focusing on database schema optimization in MongoDB to handle concurrent user requests efficiently
- Collaborated with cross-functional team of 5 developers to integrate secure RESTful APIs with JWT authentication, optimizing navigation workflows that drove a 20% increase in UX satisfaction and 10% boost in engagement metrics

Projects

HabitFlow – AI-Powered Productivity Platform | Next.js, TypeScript, Gemini AI, Supabase

Github | Live

- Integrated Google Gemini AI to generate personalized habit schedules, reducing user setup time by 40%
- Engineered complex gamification system featuring XP, Levels, and Streaks using Supabase database triggers and real-time subscriptions, achieving 3x increase in 7-day user retention (from 22% to 68%)
- Built high-performance drag-and-drop interface using @dnd-kit with optimistic UI updates, ensuring sub-50 ms interaction response time and seamless UX across desktop and mobile devices

Real-Time Chat App | MERN Stack, Socket.io, JWT, Zustand

Github | Live

- Developed a bi-directional real-time messaging system using Socket.io, achieving sub-100 ms message delivery
- Implemented JWT-based authentication with HTTP-only cookies to prevent XSS attacks and secure private conversations
- Used Zustand for global state management, reducing unnecessary re-renders and improving UI performance by 15%

Live Location Tracking Web Application | Node.js, Express, Socket.io, Leaflet.js

Github | Live

- Developed a real-time location tracking web app using Socket.IO for sub-100 ms client-server updates
- Integrated the Geolocation API with Leaflet.js and OpenStreetMap to render precise live movement on maps

Skills

Languages: C++, TypeScript, JavaScript, SQL

Frontend: Next.js 16, React.js, Redux, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases & Caching: PostgreSQL, MongoDB, Redis, Supabase

DevOps & Tools: Docker, Git, GitHub Actions, Postman, Linux (Fedora/Ubuntu)

Achievements & Certifications

- **Achieved Rank 128 out of 15,931 participants** in CodeChef Starters 67 contest
- **6th Place** in Manthan 2022 (National Hackathon)- Built a personalized travel website with an integrated AI chatbot
